Gone with the windmill

At this month-old bar and café, the idea was to create a young and fun flagship space. "We wanted the interiors to be an Instagrammer's paradise. So, it has been designed that way. A particular mention has to be made of the colourful installation in the verandah that was inspired from the kinetic motion of the mills.

The booth seating, which has been designed as love seats, is a talking point," interior designer Sumesh Menon tells us, adding that the space has been attractive for patrons and art and food bloggers.
