FARZI CAFE

Lighting it Up

A European architecture-inspired pristine white façade welcomes you into the double-storeyed Farzi Café In Lower Parel, Mumbai. Complete with fluted pseudo columns, arched windows with a charming balcony-style façade, **Sumesh Menon Associates** gives the restaurant a vintage look. While one entire

double height wall is delightfully earthy-looking with a terracotta pattern, another one is a 22-feet high backlit bar. The upper dining area displays a laser cut backlit panel laid in angular forms, while a similar screen panel is installed on the lower floor with amber tinted glass and circular designs. ■
